Charlottesville, Virginia 22901

Greg,

As the stadium project comes to a close and following the successful grand opening for the 2000 football season Barton Malow Company would like to thank Design Electric for its support during each project phase.

When you have a star player on your team you tend to rely on that player to be ahead of the pack and to pull you out when the going gets really tough.

On the stadium project our go-to-guy was Scott Bazzarre and his team- John Herndon, Tim Williams, Larry Thomas, and Jamie Knisley. Installing the hi-voltage ductbank in 10 days, wiring the video board in a week, installing a fire alarm system in the garage over the weekend- time after time Design Electric just got it done. Scott's tenacity was truly outstanding and vital to the project's success.

The Scott Stadium Expansion at the Carl Smith Center is certainly a special project that we can look back on with pride, and we look forward to working with Design Electric in the future.

Thanks for your help.

Very Truly Yours,  
BARTON MALOW COMPANY

Phil Kirby  
Vice President
